About CADES

In 1996, the French government set up the Caisse d'Amortissement de la Dette Sociale with a mission to amortise French social debt by issuing debt securities on international financial markets in a diverse range of currencies.

To enable CADES to carry out its mission, the French population pays regular taxes, which contribute, to the payment of interest and amortisation of social debt.

Supervised jointly by the Minister of the Economy, Finance and Industrial and Digital Sovereignty and by the Minister of Health and Prevention, CADES operates under the control of the French Parliament and the Constitutional Council.

CADES is well integrated into the French social system, having strong joint governance, co-chaired by a Board of Directors and a Supervisory Committee, which includes notably four members of the French Parliament.

Backed by the French Parliament, CADES is one of the most significant institutions involved in the control and reduction of French social debt by using efficient and proven amortization and financing mechanisms.

¹ According to classification from banks that led the operation.

Since 1 October 2017, teams from CADES and AFT, the French state debt management office, have merged to create a centre of excellence for issuing French public debt. In this regard, CADES has transferred operational responsibility for all its funding activities to AFT. CADES is maintained as an independent entity guaranteeing the effectiveness of the principle of confinement and amortization of social debt, retaining the prerogatives of its Executive Chairman, the board of directors and its supervisory committee. AFT operates on behalf of and for CADES, making its staff available when appropriate.
