Statutory auditor's review report on the half-yearly financial information

CADES

Period from 01/01/2026 to 06/30/2026

This is a free translation into English of the statutory auditors' review report on the half-yearly financial information issued in French and is provided solely for the convenience of English-speaking users. This report includes information relating to the specific verification of information given in the Group's half-yearly management report. This report should be read in conjunction with, and construed in accordance with, French law and professional standards applicable in France.

Dear Sir, Madam,

In compliance with the assignment entrusted to us by Board of Directors and in accordance with the requirements of article L. 451-1-2 III of the French Monetary and Financial Code ("Code monétaire et financier"), we hereby report to you on:

- the review of the accompanying half-yearly financial statements of CADES, for the period from 1st January to 30th June 2026,
- the verification of the information presented in the half-yearly management report.

These half-yearly financial statements are the responsibility of the Board of Directors. Our role is to express a conclusion on these financial statements based on our review.

1 Conclusion on the financial statements

We conducted our review in accordance with professional standards applicable in France.

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with professional standards applicable in France and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed half-yearly financial statements are not prepared, in all material respects, in accordance with the accounting standards of the credit institution that apply to CADES under the terms of CNC notice 99-04.

2 Specific verification

We have also verified the information presented in the half-yearly management report on the half-yearly financial statements subject to our limited review.

We have no matters to report as to its fair presentation and consistency with the half-yearly financial statements.

Neuilly-sur-Seine, September 25th, 2026

The Statutory auditor

CASH FLOW STATEMENT

(€ millions)	At 30 June 2026	At 30 June 2025	At 31 December 2025
Net banking income	(1,183.69)	(1,372.54)	2,652.96
Inflation premiums	-	-	-
Provisions for financial instruments	-	-	-
Amortisation of premiums and balancing payments	(14.94)	(37.54)	13.82
Change in accrued interest	408.52	25.81	61.11
Net cash from (used in) banking activities (A)	(1,607.15)	(1,384.26)	2,605.68
Net operating income	8,906.09	8,948.77	18,866.06
(Increase)/decrease in accrued income from CRDS and CSG	158.16	(81.85)	45.20
(Increase)/decrease in accrued income on social levies	-	-	-
(Increase)/decrease in accrued expenses	75.83	29.62	144.38
Unearned income ACOSS ITAFS	591.63	732.41	86.06
Provisions - sundry allocations or reversals	-	-	105.09
	-	-	-
Net cash from (used in) operating activities (B)	9,731.72	9,792.65	18,946.11
Net cash from (used in) banking and operating activities (C=A+B)	8,124.57	8,408.38	16,340.43
Net cash from (used in) financing activities (D)	1,854.48	(5,626.41)	17,028.85
Debt assumed (E)	(3,000.00)	-	-
Net cash flow for the period (C+D+I)	6,979.05	2,781.98	(688.42)
Net cash at beginning of period	5,403.96	6,092.39	6,092.39
Net cash at end of period	12,383.01	8,874.36	5,403.96
Net cash flow for the period	6,979.05	2,781.98	(688.42)

The cash flow statement takes into account the following items:

- A – net cash from (used in) banking activities

This is net banking income (debts plus income from derivatives and cash instruments) less income and expenses with no effect on the cash position (provisions, amortisation of issuance and redemption premiums, accrued interest, revaluation of index-linked bonds, etc.).

- B – net cash from (used in) operating activities

This is the operating profit or loss (mainly income from CRDS and CSG, social levies on income from property and investments and from the FRR) less income and expenses with no effect on the cash position (accrued income or accrued expenses).

- C – cash from (used in) banking and operating activities

This consists of net cash from (used in) banking and operating activities (C = A + B).

- D – net cash from (used in) financing activities

These are the cash flows resulting from debt issuance and debt repayment during the period.

- E – social security debt assumed

Social security debt assumed represents the amount recognised under reserves during the period by CADES in respect of debt assumed from social security funding organisations.

The net change in cash and cash equivalents reflects the following cash flows:

- cash from (used in) banking and operating activities (C);
- net cash from (used in) financing activities (D);
- social security debt assumed (E).

NOTES TO THE FINANCIAL STATEMENTS

FIRST HALF 2026 HIGHLIGHTS

- **Financing transactions**

- **Issues (excluding commercial paper)**

CADES borrowed €15.11 billion:

- Two issues made under the French programme in EUR, for an amount of €5 billion;
- Three issues made under the English programme in USD, for an amount of €8.96 billion;
- One issue made under the French programme in GBP, for an amount of €1.15 billion.

- **Redemptions (excluding commercial paper)**

CADES reimbursed €10.82 billion at maturity:

- One issue made under the French programme in EUR, for an amount of €3 billion;
- Two issues made under the English programme in USD, for an amount of €7.82 billion.

- **Credit lines**

Commitments received as at 30 June 2026 comprise:

- Five activation agreements for credit lines enabling CADES to add funds directly to its euro-denominated deposit account held with Banque de France, totalling €1.3 billion and cancellable by the counterparties at 30 to 60 days' notice, depending on the counterparty.

- **Debt assumption**

Three individual payments of €1 billion each, totalling €3 billion, were made to ACOSS during the first half of 2026 (9 April, 17 April and 8 June).

ACCOUNTING POLICIES AND METHODS

1. Basis of valuation and presentation

The accounting policies adopted by CADES meet two requirements.

Given that the activity of CADES is essentially financial, the financial statements are prepared in accordance with accounting regulations applicable to credit institutions and financial institutions as well as with generally accepted accounting principles in France. In particular, CADES has applied the accrual concept and the prudence concept.

The presentation of the financial statements complies with Regulation No. 2014-07 of 26 November 2014 issued by the French Accounting Standards Authority (*Autorité des Normes Comptables* – ANC) relating to the financial statements of banking sector companies. In its opinion CNC 99-04, the French National Accounting Board decided that CADES could present certain transactions in a manner specific to it. Accordingly, in its profit and loss account, CADES records operating income and expenses, which are mainly composed of the revenue drawn from the CRDS and CSG and from property transactions, and payments to the State and social security funding organisations.

2. Specific characteristics of CADES

CADES has been tasked with paying down the debt transferred to it. The profit for the year therefore measures its capacity to reduce its own debt, and corresponds to the resources allocated to CADES less the financial costs relating to its debt with third parties.

The profit and loss account should be interpreted in light of the specific mission entrusted to CADES, the sole purpose of which is to extinguish a debt over its scheduled term.

3. Debts assumed from social security funding organisations

On the effective date of the Decree that sets the amounts and dates of payments that CADES must make in respect of debts assumed from social security funding organisations in accordance with the social security deficit funding acts, the amounts payable are recognised under amounts payable to social security funding organisations, with an offsetting entry against the profit and loss account brought forward¹.

When CADES' actual payments to the social security bodies as determined on the basis of the provisional deficits are greater than the deficits subsequently established, an adjustment may be made in CADES' favour. These adjustments are recognised against the profit and loss account brought forward at the time of the payment.

Debts assumed in accordance with legal stipulations but for which the amounts and payment dates have not yet been set by decree are recorded as off-balance sheet commitments.

¹ Opinion No. 2010-01 of 9 February 2010

4. CADES' resources

Ordinary Law No. 2020-992 of 7 August 2020 on the social security debt and autonomy, which amends Order No. 96-50, extended CADES' term, initially set to end in 2024, to 31 December 2033 and allocated the following resources to CADES in the future:

- maintenance of 0.5 percentage points of CRDS until it has completed its missions;
- maintenance of 0.6 percentage points of CSG until 2023 and then 0.45 percentage points from 2024 to 2033;
- an annual payment of €2.1 billion from the FRR until 2024 and then of €1.45 billion from 2025 to 2033.

4.1 - Contribution to the repayment of social security debt

▪ Revenue explicitly allocated to CADES

The social security debt repayment contribution (CRDS) defined by Order No. 96-50 of 24 January 1996 was explicitly created to provide resources to CADES: Article 6 of said Order states that "the proceeds of the contributions created in respect of Chapter 2 of said Order on repayment of the social security debt shall be allocated to *Caisse d'Amortissement de la Dette Sociale*".

▪ A broad-based tax

The tax is levied on multiple sources of income. One can distinguish between:

- On the one hand, employment income and unemployment and similar benefits: salaried income, redundancy payments and retirement indemnities (under certain conditions), retirement and disability pensions, health and maternity benefits, housing benefits, family allowances and child-minding benefits, etc., and
- On the other hand, income from property, from investments, from the sale of precious metals, gems, *objets d'art*, collectors' items and antiques, and from gaming.

Contributions assessed on the sales of precious metals and gems are collected by the State's financial agencies (DGFIP) before being paid over to CADES.

Contributions assessed on employment income, unemployment and similar benefits as well as income from property, investments and gaming are paid over daily by ACOSS to CADES as and when they are collected by the central agency.

▪ Collection costs borne by CADES

Article 8 of the Order of 24 January 1996 stipulates that CADES shall bear assessment and collection costs. These costs consist of a flat amount defined jointly by the Minister of the Economy and Finance and the Minister of Social Security.

Collection agencies deduct a 0.5% withholding from the contribution paid over to CADES.

CRDS contributions levied on income from property entered in the tax assessment register mainly by the offices of the DGFIP (*Direction Générale des Finances Publiques* or Directorate General of Public Finances) are paid over to CADES on the basis of register entries and not the amounts actually collected. In return, a 4.1% withholding is applied to the sums paid over to CADES to cover assessment and collection costs (0.5%) and the cost of tax reductions and bad debts (3.6%), as provided for by Article 1641 of France's General Tax Code (*Code Général des Impôts*).

Amounts collected by CADES in respect of the CRDS are reported under "Other operating income" in the profit and loss account. Assessment and collection costs are recorded under "Other operating charges".

- Accrual basis accounting

CADES applies the accruals principle in accordance with accounting standards applicable to credit institutions and Articles L.114-5 and D.114-4-4 of the Social Security Code establishing the principle whereby social security agencies shall maintain accounting records on a receivable-payable basis.

Accordingly, CRDS contributions paid to collecting agencies are included in the accounts for the period regardless of the date on which these amounts were actually collected. So as to be able to recognise this accrued income and deferred income at the balance sheet date, CADES accrues this income on the basis of a notification provided by the collecting agencies indicating amounts assessed for the period not collected at the balance sheet date and CRDS contributions not yet collected by ACOSS. Provisions against outstanding CRDS contributions are notified to CADES by ACOSS. These provisions are calculated on a statistical basis applying an annual rate determined by reference to an ageing analysis of the receivables and, for receivables arising from payment extensions granted as a result of the COVID-19 health crisis, factoring in the likelihood that they will be collected based on current economic circumstances. These provisions are deducted from gross amounts receivable as reported in the balance sheet.

Regarding the collection of the CRDS contributions, note that at no time does CADES act as primary collector; all the resources to which it is entitled are remitted by third parties, first and foremost ACOSS, followed by the offices of the DGFIP.

CADES' responsibility is confined to verifying that the sums transferred agree to the accounting vouchers raised. The primary collecting agencies are responsible for transferring the funds, for verifying the tax base, for adjusting tax bases when applicable and for recovering past dues, in return for which these agencies receive a remuneration equivalent to 0.5% of the sums collected.

Accordingly, CADES' responsibility at revenue level is limited to substantive verifications of the accounting vouchers produced by the collecting agencies.

4.2 - Supplementary social security contribution

The 2009 Social Security Financing Act No. 2008-1330 extended the mission of CADES by entrusting to it an additional €27 billion of debt in respect of the health insurance deficit (€14.1 billion), old age pension deficit (€8.8 billion) and senior citizens' solidarity fund (€4 billion).

Pursuant to the Organic Law of 2 August 2005, the French Parliament voted to increase CADES' resources so as not to extend its life. These new resources correspond to a portion of the supplementary social security contribution (*Contribution Sociale Généralisée* – CSG). Since 2009, this has been paid to CADES at the rate of 0.2%. From 2011 it was increased to 0.48% and then from 1 January 2016 to 0.60% for CSG on all taxable employment income, unemployment and similar benefits, and income from property and investments, while CSG on profits from gaming was increased from 1 January 2016 to 0.30% and from 1 January 2021 to 0.22%.

Ordinary Law No. 2020-992 of 7 August 2020 on social security debt and autonomy, which amends Order No. 96-50, maintains the payment of 0.6 percentage points of CSG until 2023 and then of 0.45 percentage points from 2024 to 2033.

This is a broad-based tax levied on employment income, unemployment and similar benefits as well as income from property, investments and gaming.

The difference in tax base between the CRDS and CSG mainly concerns revenue from the sale of precious metals and gems, from gaming and from family benefits.

The payment circuits and methods of accounting for the CSG are the same as for the CRDS (see 4.1).

4.3 - Social levies on income from property and investments

Act No. 2010-1594 of 20 December 2010 allocated to CADES, starting in 2011, a 1.3% share of the social levies on the income from property and investments referred to in Articles 245-14 and 245-15 of the Social Security Code. The rate for these levies is set at 5.4% as from 1 January 2012. With effect from 1 January 2016, the payment of 1.3% of social levies on income from property and investments was replaced by an increase of 0.12% in the portion of the CSG paid to CADES.

4.4 - Resources from the Retirement Reserve Fund

Under the 2011 Social Security Financing Act (*Loi de Financement de la Sécurité Sociale* – LFSS) No. 2010-1594 of 20 December 2010, the Retirement Reserve Fund (*Fonds de Réserve pour les Retraites* – FRR) is required to pay CADES a total of €29.4 billion in instalments of €2.1 billion no later than 31 October each year, with effect from 1 January 2011 until 2024. Law No. 2020-992 of 7 August 2020 on social debt and autonomy provided for an additional annual payment of €1.45 billion from 2025 to 2033. The two institutions concerned have an agreement setting out the timing and terms and conditions governing these payments.

This annual resource paid by the FRR is recognised under income for the period.

FRR's commitment to pay amounts for subsequent years is recognised in off-balance sheet items under "Other commitments received – Retirement Reserve Fund".

5. Private rental property

CADES has sold all the property transferred to it on 1 January 2000 in application of Article 9 of Order No. 96-50 of 24 January 1996 and recorded under "Property endowment" as a component of reserves. Acting on behalf of CADES, CNAV managed the residual rights and obligations related to this property until the expiration of the agreement between the two parties on 31 December 2006.

Signed in December 1999, this agreement empowered CNAV to do all that was necessary in connection with the administration of the properties.

Since 1 January 2007, CADES has been managing disputes and claims internally. No disputes were in progress at 30 June 2026.

CADES' Accounting Officer records expenses and revenue on the basis of the supporting documents submitted by the Authorising Officer.

6. Transactions denominated in foreign currencies

Foreign currency transactions are recorded on a multi-currency basis and are measured in accordance with the following principles:

- Foreign currency transactions involving balance sheet and off-balance sheet items are measured in euro at the rate of exchange ruling on the balance sheet date.
- The rates used at 30 June 2026, which correspond to the reference rates communicated by the European Central Bank, are indicated in the table below:

USD:	1.1394	SEK:	11.0935	GBP:	0.86178
AUD:	1.6544	NOK:	11.3105	MXN:	19.9030
CHF:	0.9224	NZD:	2.0136	HKD:	8.9350
CAD:	1.6220	TRY:	53.1642	JPY:	185.0800
ZAR:	18.6544	SGD:	1.4754	CNY:	7.7314

- Foreign currency income and charges are translated into euro at the exchange rate ruling on the date when they were recognised in the profit and loss account.
- Realised and unrealised foreign exchange gains and losses are recognised in the profit and loss account as operating income from banking transactions or operating charges on banking transactions.

7. Repurchase agreements with securities delivered

Only securities issued or guaranteed by the State may be used as security by CADES in repurchase agreements entered into to invest its cash balances.

Securities received under these agreements are reported under loans and advances to credit institutions.

These operations are managed by Agence France Trésor as part of the management of the institution's euro cash via the Single Treasury Account.

8. Tangible and intangible fixed assets

Fixed assets are accounted for under the historical cost convention. Tangible fixed assets are depreciated and intangible fixed assets amortised over their estimated useful life.

Tangible fixed assets consist mainly of office equipment and computer hardware.

Intangible fixed assets consist of software.

9. Bonds

Bonds issued by CADES are reported as a liability in the balance sheet at their nominal value (if redeemed at par) plus accrued interest. Foreign currency bonds are translated into euro at the exchange rate prevailing on the balance sheet date.

Bonds indexed to inflation (French consumer price index excluding tobacco for all households in Metropolitan France) are measured by reference to a predefined inflation benchmark on the balance sheet date, resulting in the recognition of a redemption premium that is reported as a liability. There were no outstanding indexed bonds at 30 June 2026 in CADES's financial statements.

When bonds are issued at a premium, this premium is accounted for as deferred charges and is therefore reported under prepayments and accrued income in the balance sheet. These charges are recognised to the profit and loss account over the life of the bonds under banking operating charges.

When bonds are issued at a discount, this discount is accounted for as deferred income. This income is recognised to the profit and loss account over the life of the bonds under banking operating income. All costs relating to bond issues are charged to the profit and loss account on the date of issue and reported under "fees paid".

10. Interest rate or currency swaps

Commitments in respect of transactions involving forward financial instruments, entered into for the purpose of hedging interest rate and currency exposure, are reported as off-balance sheet commitments at the contract's nominal value. Accounting principles applied differ according to the nature of these instruments and management intention at inception.

Transactions consist mainly of interest rate swaps and currency swaps entered into for hedging purposes. Interest rate swaps are entered into in compliance with the risk management policy defined by the Board of Directors. Currency swaps are entered into only for the purpose of hedging CADES' foreign exchange exposures.

Income and charges arising on forward financial instruments entered into for the purpose of hedging or managing the global interest rate exposure are recognised to profit or loss pro rata temporis.

Gains and losses on hedging designed to reduce the risk resulting from a particular asset or liability are taken to profit or loss and included under interest receivable and similar income or interest payable and similar charges to match income or charges recognised in respect of the hedged item.

As regards balancing cash payments arising from swaps entered into to hedge a debt instrument on inception, their amount is spread over the term of the swap agreement on a pro rata basis, in the same way as issue premiums.

11. Provisions

No general provisions for liabilities and charges are recognised by CADES. When appropriate, provisions in respect of identified risks are set aside in accordance with applicable accounting principles.

12. Taxation

CADES is not assessed to business taxes (corporation tax, value added tax and local business tax) or to apprenticeship tax. The only tax it pays is the payroll tax.

Note that profits on the sale of property transferred by the social security agencies did not give rise to the payment of corporation tax.

13. Counterparty risk

CADES may be exposed to counterparty risk on only one type of transaction: forward market transactions.

In this particular case, CADES has signed with all its counterparties AFB or FBF forward market agreements providing for daily or weekly margin calls depending on the counterparty and the agreement in place.

To manage its interest rate risk and eliminate currency and/or structural risk, CADES enters into transactions in the forward markets involving instruments such as interest rate swaps, currency swaps and asset swaps.

CADES uses daily or weekly margin calls to minimise the residual risk on these instruments in the event of counterparty default.

14. Conflict in Ukraine

In the current context concerning the situation in Ukraine and the consequences of the sanctions imposed on Russia, CADES is monitoring the possible impact on its activities and risks.

The central depositories designated under its various programmes are responsible for applying sanctions against Russia.

NOTES

BALANCE SHEET

At 30 June 2026, the balance sheet showed total assets of €16,180.08 million for total debt of €145,112.16 million, resulting in negative reserves of €129,000.48 million.

Property rental adjustment account	-	-	-
Other	133.44	-	-
TOTAL	2,359.92	2,347.38	2,376.63

Prepayments and accrued income consist of transactions affecting the profit and loss account independently of the date on which the corresponding income is paid or collected. They include:

- accrued income relating to CRDS and CSG (€1,505.03 million) and foreign currency financial instruments (€421.07 million);
- issuance premiums on bonds and EMTN amounting to €255.3 million to be recognised in profit and loss over time;
- prepayments amounting to €32.05 million, which consist mainly of prepaid interest on the issue of negotiable debt instruments;
- other accruals and deferred income, including foreign exchange adjustment accounts totalling €12.59 million (technical accounts used to recognise to profit and loss adjustments arising on the measurement of off-balance sheet commitments.) and miscellaneous items totalling €133.44 million (an account recording the accruals relating to ACOSS advance payments made in early June and July 2026 in respect of May and June 2026)

LIABILITIES AND RESERVES

In respect of liabilities, a distinction is made between CADES' reserves and its other liabilities.

Reserves, which consist of the profit and loss account brought forward (-€136,904.11 million), the profit or loss for the first half of 2026 (€7,722.40 million) and the property endowment (€181.23 million), came to -€129,000.48 million.

The profit and loss account brought forward broke down as follows:

Debts evidenced by securities are analysed below:

Debts evidenced by securities totalled €131,362.43 million and comprised negotiable debt securities totalling €3,751.99 million and bonds and similar instruments totalling €127,610.44 million.

Bonds and similar instruments are issued under a borrowing programme approved by the Minister of the Economy and Finance on 15 December 2017, and may be stand-alone or part of the following programmes:

- a French issuance programme for which the maximum amount of outstandings is €130 billion;
- an English issuance programme for which the maximum amount of outstandings is €65 billion;
- a New York commercial paper issuance programme for which the maximum amount of outstandings is €60 billion;

- a French medium-term note (NEU MTN) issuance programme for which the maximum amount of outstandings is €10 billion;
- a French short-term note (NEU CP) issuance programme for which the maximum amount of outstandings is €20 billion;
- an Australian issuance programme for which the maximum amount of outstandings is AUD 6 billion.

All in all, at 30 June 2026 debts evidenced by securities maturing within one year totalled €23,281.72 million and by those maturing in more than five years €33,815.86 million, compared with €29,127.54 million and €35,270.55 million, respectively, at 31 December 2025. Debt due to mature at between one and five years rose from €65,217.31 million at 31 December 2025 to €74,264.85 million at 30 June 2026.

The table below details borrowings (in millions) by programme:

Sub-total foreign currencies		44,987		(44,987)		-
TOTAL		130,487		302		130,789

The table above provides a breakdown of the initial nominal debt by issuance currency. Since all transactions in foreign currencies have been hedged, the debt of CADES is synthetically entirely in euro. Hedging transactions have enabled CADES to eliminate the impact of exchange rate fluctuations on its debt.

The table below shows the breakdown of CADES' debt by interest rate type. Hedging impacts the initial breakdown, such that in the final analysis, 90.13% of the debt bears fixed rates and 9.87% floating rates. CADES has not had any inflation-indexed debt since the CADESI loan was repaid in July 2024.

Accruals and deferred income consist of accounting transactions recognised in the income statement independently of the date on which the corresponding income is paid or collected.

They include notably:

- Accruals in respect of CRDS and CSG for €4.50 million and forward currency transactions for €396.80 million;
- Balancing cash payments to be spread on currency swaps amounting to €90.31 million;
- Unearned income, corresponding to premiums on bond issues amounting to €59.72 million;
- Other unearned income amounting to €725.07 million including €725 million corresponding to the FRR payment made in the first half of the year totalling €1,450 million;
- foreign currency adjustment accounts amounting to €332.58 million, being technical accounts used to recognise to profit and loss adjustments arising on the measurement of off-balance sheet commitments.

Note 8a: Provision accounts

Provisions for liabilities and charges include provisions for:

- redundancy indemnities;
- remuneration of days saved by CADES employees;
- provisions for liabilities and charges in respect of CSG and CRDS.

PROFIT AND LOSS ACCOUNT

In arriving at the profit for the period, net banking income is reported separately from other operating income and charges.

Net banking income	(1,183.69)	(€ millions)
Exceptional income	-	(€ millions)
Other operating income and charges	8,906.08	(€ millions)
Net profit for the period	7,722.40	(€ millions)

CADES has been tasked with paying down the debt transferred to it. The profit for the year measures its capacity to reduce its own debt.

Net banking income

Net banking income consists of the cost of debt, the income generated from cash positions and the net profit or loss on financial transactions.

Note 9: Banking income

(€ millions)	At 30 June 2026	At 30 June 2025	At 31 December 2025

TOTAL	1,415.52	1,523.07	3,014.85

Interest payable and similar charges on CADES' debt, which amounted to €1,415.52 million, decreased by 7% from 30 June 2025 and consists of:

- Charges amounting to €1,399.34 million in respect of debts;
- Interest amounting to €0.32 million on transactions with credit institutions, consisting of interest on private placements, margin calls and other exchange rate instruments;
- Fees amounting to €15.86 million.

The decrease in interest and similar charges compared with 30 June 2025 was partly due to the fall in interest rates on commercial paper transactions.

Note 11: Gains and losses on trading securities

(€ millions)	At 30 June 2026	At 30 June 2025	At 31 December 2025
NET GAIN (LOSS) ON FOREIGN EXCHANGE TRANSACTIONS	0.00	0.00	0.00
Other foreign exchange transactions	0.00	0.00	0.00

Other operating income and charges

Other operating income and charges consist mainly of specific income and charges dealt with by Order No. 96-50 of 24 January 1996 (CRDS contributions, CSG, social levies on income from property and investments, payments from the Retirement Reserve Fund, property asset sales and payments to the State and social security funding organisations), general operating charges and depreciation, amortisation and impairment charges on non-current assets.

Note 12: CRDS revenues

The table below details revenue allocated to CADES under Article 6 of Order No. 96-50 of 24 January 1996 after deducting assessment and collection costs and losses on outstanding CRDS contributions (write-offs, waivers, cancellations and debt forgiveness):

(€ millions)	At 30 June 2026	At 30 June 2025	At 31 December 2025
NET CRDS REVENUES (Article 6)	4,401.99	4,415.70	9,301.30
CRDS contributions levied on employment income and unemployment benefits	3,949.44	3,995.20	8,132.66
CRDS contributions levied on property assets	113.32	107.98	403.81
CRDS contributions levied on investment income	246.38	222.26	549.00
CRDS contributions levied on sales of gems and precious metals	7.60	4.77	11.24
CRDS contributions levied on gaming proceeds	85.25	85.49	204.58
CRDS exemption offsets (travel vouchers and voluntary community services)	-	-	-

CRDS revenues, net of collection costs, amounted to €4,401.99 million.

CRDS levied on taxable employment income, unemployment and similar benefits (which is mainly collected by ACOSS) represents 89.7% of the total. CRDS collected by the offices of the Directorate General of Public Finances and levied mainly on capital (property and investment income) represented 8.1%. CRDS on gaming winnings and the sale of precious metals represented 1.9% of the total.

Note 12a

The table below provides a breakdown of income and charges relating to the CRDS at 30 June 2026.

(€ millions)				
CRDS REVENUES	(I)	CRDS COSTS	(II)	Net revenues (I-II)
CRDS on employment income and unemployment benefits	4,009.47	Write-offs, waivers, cancellation and debt forgiveness	40.10	3,949.44
		Assessment and collection costs	19.93	
CRDS levied on property assets	118.13	Assessment and collection costs	4.82	113.31
CRDS levied on investment income	247.63	Assessment and collection costs	1.24	246.39
CRDS levied on sales of gems and precious metals	7.64	Assessment and collection costs	0.04	7.60
CRDS levied on gaming proceeds	85.67	Assessment and collection costs	0.43	85.24
CRDS exemption offsets (travel vouchers and voluntary community services)	-		-	-
Reversal of provisions on outstanding CRDS to be collected	-	Provisions on outstanding CRDS to be collected	-	-
TOTAL	4,468.54	TOTAL	66.56	4,401.98

Note 12.1: CSG revenues

Supplementary social security contributions (*Contribution Sociale Généralisée* – CSG) are a resource allocated to CADES at the rate of 0.45% since 1 January 2024 for CSG on taxable employment income, unemployment and similar benefits, and income from property and investments, and at 0.22% for CSG on profits from gaming.

The tax base is similar to that of the CRDS, with the exception that no contributions are levied on the sale of gems and precious metals.

(€ millions)	At 30 June 2026	At 30 June 2025	At 31 December 2025
NET CSG REVENUES (Article 6)	3,780.37	3,809.30	8,013.23
CSG contributions levied on employment income and unemployment benefits	3,452.33	3,508.17	7,156.20
CSG contributions levied on property assets	99.88	95.66	348.52
CSG contributions levied on investment income	221.74	200.03	494.09
CSG contributions levied on gaming proceeds	6.42	5.44	14.41
CSG exemption offsets	-	-	-

CSG revenues, net of collection costs, amounted to €3,780.37 million.

CSG levied on taxable employment income, unemployment and similar benefits (which is mainly collected by ACOSS) represents 91.3% of the total. The remaining CSG is levied on investment income, profits from gaming and property income (8.7%).

Note 12.1a

The table below provides a breakdown of income and charges relating to the CSG at 30 June 2026.

(€ millions)				
CSG REVENUES	(I)	CSG COSTS	(II)	Net revenues (I-II)

Reversal of provisions on outstanding CSG to be collected	-	Provisions on outstanding CSG to be collected	-	-
TOTAL	3,846.62	TOTAL	66.25	3,780.37

Note 12.2: Social levies on income from property and investments

Social levies on income from property and investments were a source of revenue allocated to CADES from 1 January 2011 under Act No. 2010-1594 of 20 December 2010 (pursuant to Articles 245-14 and 245-15 of the French Social Security Code). Since 1 January 2016, CADES no longer receives the 1.3% portion of these levies, but an additional 0.12% of CSG.

TOTAL	1.27	1.25	2.53

General operating charges correspond to expenditure falling within the scope of the administrative budget. They do not include the acquisition and the amortisation and depreciation of fixed assets (see Note 2).

List of staff positions at 30 June 2026

Non-civil servant public sector employees:

- 1 senior front-office manager (grade A)
- 1 deputy front-office manager (grade A)
- 1 asset and liabilities matching strategist (grade A)
- 1 senior back-office manager (grade A)
- 1 deputy back-office manager (grade A)
- 1 communication officer (grade A)
- 1 internal control officer (grade A)

Civil servant employee:

- 1 secretary general (grade A)

CADES has made available non-civil servant public sector employees to AFT since 1 September 2017 and has accordingly paid the corresponding salaries, employer charges and payroll taxes, which have then been reimbursed annually by the Directorate General of the Treasury (DGT). In accordance with the terms of the services framework agreement signed on 1 September 2017 by CADES and the DGT, these salaries are then rebilled to CADES.

CADES' administrative expenses came to €0.70 million for the first half of 2025 and comprised mainly operating costs paid directly by the Ministry of the Economy and Finance in respect of activities carried out by AFT on behalf of CADES, in accordance with the financial agreement of 22 November 2018.

OFF-BALANCE SHEET COMMITMENTS

Off-balance sheet commitments distinguish between commitments given and commitments received and are analysed between loan commitments, guarantee obligations and guarantees on securities. Certain commitments are not recorded on the face of the accounts, being commitments in respect of currency transactions and forward financial instruments. Information regarding these commitments is provided in Notes 16 and 17 below.

Note 16: Currency transactions

Financing commitments given under repurchase agreements, currency purchases and treasury bills	-	-	-

Commitments received consist of:

- Five activation agreements for credit lines enabling CADES to add funds directly to its euro-denominated deposit account held with Banque de France, totalling €1.3 billion and cancellable by the counterparties at 30 to 60 days' notice depending on the counterparty; and
- A total of €10.15 billion in payments from the Retirement Reserve Fund, corresponding to the annual payments of €1.45 billion for the period from 2026 to 2033, pursuant to Act No. 2020-992 of 7 August 2020 on social security debt and autonomy.
- Exit tax receivables. As a reminder, CADES is allocated a portion of the CSG and CRDS levies on the exit tax. The DGFIP has notified ACOSS of off-balance-sheet liabilities relating to social security contribution claims under the exit tax scheme, for which payment has been suspended. In the absence of detailed information broken down by type of levy (CSG, CRDS or social security contributions) and by reference period, ACOSS is unable to allocate these amounts accurately to the relevant recipients. However, a rough estimate of this breakdown has been carried out in order to assess the order of magnitude by recipient, and in this context, the amount of off-balance-sheet exit tax liabilities relating to CADES is estimated to be around €337.9 million.

Note 19: Abridged statements

SUMMARY BALANCE SHEET AT 30/06/2026		(€ millions)
PROFIT AND LOSS ACCOUNT CARRIED FORWARD AT 31 DECEMBER 2025		(136,904.11)
PROFIT FOR THE PERIOD ENDED 30 JUNE 2026		7,722.40
PROPERTY ENDOWMENT		181.23
DEBT REMAINING TO BE REPAID AT 30 JUNE 2026		(129,000.47)
Represented by:		
. Liabilities towards third parties		
. Borrowings falling due within 1 year		23,281.70
. Borrowings falling due after 1 year		108,080.71
. Other creditors, accruals and unearned income		13,749.75
. Less assets held by CADES		
. Financial investments		12,383.01
. Other debtors, prepayments and accrued income		3,728.67
PROFIT AND LOSS ACCOUNT PERIOD ENDED 30 June 2026		(€ millions)
NET REVENUE FROM CRDS, CSG AND SOCIAL LEVIES		8,182.35
ESTIMATION CHANGES AND ERROR ADJUSTMENTS		-
NET REVENUE FROM RETIREMENT RESERVE FUND (FRR)		725.00
NET REVENUE FROM PROPERTY		-
Interest payable and similar charges		(1,399.66)
Fees		(15.86)
Interest receivable and similar income		231.84
NET FINANCIAL CHARGES		(1,183.69)
Operating charges		(1.26)
OPERATING PROFIT		7,722.40
Provisions for sundry liabilities		-
Exceptional income and charges		-
PROFIT FOR THE PERIOD ENDED 30 JUNE 2026		7,722.40

OTHER INFORMATION

The table below provides information on market value, comparing the debt at repayment value as at 30 June 2026 with the debt at market value.

Debt at repayment value as at the closing date comprises the following elements:

- a. The nominal value of fixed rate, variable rate and adjustable rate borrowings in euros;
- b. The nominal value of the fixed rate, variable rate and adjustable rate euro legs of basis swaps representing perfect transformation of foreign currency-denominated borrowings into euro-denominated borrowings;
- c. The accrued nominal value of inflation indexed bonds as at 30 June 2026;
- d. Interest accrued but not yet due is excluded from debt at repayment value.

Debt at repayment value at maturity comprises the following elements:

- a. The nominal value of fixed rate, variable rate and adjustable rate borrowings in euros;
- b. The nominal value of the fixed rate, variable rate and adjustable rate euro legs of basis swaps representing perfect transformation of foreign currency-denominated borrowings into euro-denominated borrowings;
- c. The projected nominal value at maturity of inflation indexed bonds;
- d. The market value of swaps used for macro hedging.

Debt at market value comprises the following elements:

- a. The value of the fixed rate bonds and inflation indexed bonds based on the average market price on 30 June 2026;
- b. The value of unlisted securities issued by CADES obtained using the CADES zero-coupon curve as at 30 June 2026. Options embedded in certain of these securities are valued using an internal model based on standard valuation software developed and marketed by an independent service provider.
- c. The value of derivatives used to transform part of the debt through micro hedging. Options embedded in certain of these instruments are valued using the same internal model;
- d. The value of derivatives used for macro hedging;
- e. The present value at 30 June 2026 of collateral, repurchase agreements and bank balances.

(€ millions)	DEBT AT REPAYMENT VALUE		DEBT AT MARKET VALUE	MARKET VALUE OF HEDGING TRANSACTIONS
	At maturity	At 30 June 2026	At 30 June 2026	At 30 June 2026
Up to 1 year	9,040.47	9,040.47	9,170.98	339.59
From 1 to 5 years	74,368.80	74,368.80	72,365.53	1,041.35
Over 5 years	33,752.27	33,752.27	31,848.75	(88.48)
Swaps	-	-	-	-
TOTAL	117,161.53	117,161.53	113,385.25	1,292.46
Variable rate	(713.43)	(713.43)	(752.60)	379.52
Indexed rate	-	-	-	-
Fixed rate	117,874.97	117,874.97	114,137.85	912.94
Swaps	-	-	-	-
TOTAL	117,161.53	117,161.53	113,385.25	1,292.46

*The balance of variable rate debt is determined by taking into account:

- the amount of variable rate borrowings,
- the outstanding margin calls,
- and the cash balances in CADES's bank accounts.

At 30 June 2026, this balance shows that CADES has a net lending position in variable rate debt.

Compared with the previous financial year, at 30 June 2026 there had been a decrease in the proportion of short-term debt (-6.37 pp) and long-term debt (-4.1 pp) and an increase in that of medium-term debt (+1.39 pp), as shown by the table below:

DEBT	At 30 June 2026	At 30 June 2025	At 31 December 2025
Short term (< 1 year)	7.72%	14.09%	16.84%
Medium term	63.48%	53.09%	54.34%
Long-term (> 5 years)	28.81%	32.82%	28.81%

As regards the breakdown between issues denominated in euro and other currencies, in the half-year ended 30 June 2026 the proportion of debt denominated in euros and foreign currencies stabilised compared with 31 December 2025, as shown by the table below:

DEBT	At 30 June 2026	At 30 June 2025	At 31 December 2025
In foreign currencies	34.63%	35.95%	35.95%
In euros	65.37%	64.05%	64.05%

The post-hedging book-value-debt breakdown below shows an increase in the proportion of fixed rate debt, while the proportion of variable rate issues decreases and that of indexed issues remains zero:

DEBT	At 30 June 2026	At 30 June 2025	At 31 December 2025
Variable rate	0.00%	6.36%	10.50%
Indexed rate	0.00%	0.00%	0.00%
Fixed rate	100.00%	93.64%	89.50%

Explanation of variances between market value and repayment value of debt:

The difference between the market value of the debt and its repayment value is explained by the following factors:

- The market value of fixed rate loans decreased because of the increase in interest rates;
- Market value factors in the present value of future coupons whereas repayment value excludes coupons; and
- Gains and losses on macro-hedging swaps impact market value one way or the other.

The above information covers a significant part of CADES' main activity, which is to repay in the best possible conditions the debt it raises on the financial markets.
